"Section 53-A. The following charges shall be collected from the owner, or in behalf of the owners, the carrier of shipment of fish or other aquatic products in commercial quantity landed in any wharf or point within the City of Mandaue:

- a. Twenty-Five (P25.00) Pesos, regardless of volume or quantity, unless the shipment or shipments are covered by auxiliary invoice from the point of source or origin. However, same shall apply only to fishery and other aquatic products other than fresh fish;
- b. One (P1.00) Peso per basket known as "Bañera", as inspection fee. This fee shall only apply to the inspection of fresh fish. A "Bañera" is a receptacle made usually of steel that looks like a tub because of its widecircular opening and a smaller circular base, commonly used in commercial fishing as the base of measurement for every fish catch.

Should the shipment be found or reasonably suspected to be illegally caught with dynamite or poisoned, or otherwise laced with formalin or other hazardous chemicals, it shall immediately be impounded and submitted to chemical analysis.

A Fish Warden trained to detect illegally caught or chemically-laced fish, who is duly authorized to issue official receipts and handle public funds, shall be assigned to collect the prescribed fees and charges."

SECTION 2. Prior ordinances or portions thereof, which are inconsistent herewith, are hereby amended, superseded or modified accordingly.
